

Ballenger Motorsports Mini-Catalog rev 10-08

This is a small reference catalog to showcase some of the items we carry in an easy to read format. Due to the increasing variety and stock of our online store we have decided to provide this as a service to our customers.

As our product line is continually increasing, a more extensive product collection may be found in our online store.

Ballenger Motorsports specializes in high performance electronics for the automotive and industrial markets. Our staff is made up of engineers, tuners and programmers sharing enthusiasm for Motorsports of all kinds. We do everything from parts retail to building custom wire harnesses for OEMs to software & hardware design for industrial applications.

Our staff can help you with electronic connectors, wideband sensors, tuning services or consulting services for a wide variety of applications.

Ballenger Motorsports was founded in July, 2003 to design, manufacture and retail high quality performance parts for Motorcycles, Cars, ATV's & Trucks with a focus on electronic components. We focus on engineering the highest quality control systems at low cost. Our unique approach combines hard work and experience to deliver excellent products directly to the consumer.

Our experience has taught us that it is extremely important to deliver reliable, thoroughly tested and well-documented products for the consumer market. This common sense approach is sometimes lost in the interest of greater sales by the management of other companies in our industry. We believe that long term growth and profitability comes from a strong foundation of reliable, well supported products rather than marketing flash. We test every electronic part manufactured by Ballenger Motorsports rigorously and will proudly stand behind our products.

The Ballenger Motorsports website is a 256-bit SSL encrypted page. While most websites are unencrypted, 40 or 128 bit encryption, we work diligently to provide an easy and secure web ordering environment. We are constantly adding new products to our website and keep our stock information up to date.
